GETTING STARTED

<https://roelvanlisdonk.tfspreview.com/>
The account is active and ready for use.
Please save the above Url for your records.

[Beginner's guide](#)
A step-by-step guide to help you get running now.

[Create a team project](#)
Create a new team project for your team to collaborate in.

[Make a suggestion](#)
Provide suggestions for how we can improve our Team Foundation Service Preview.

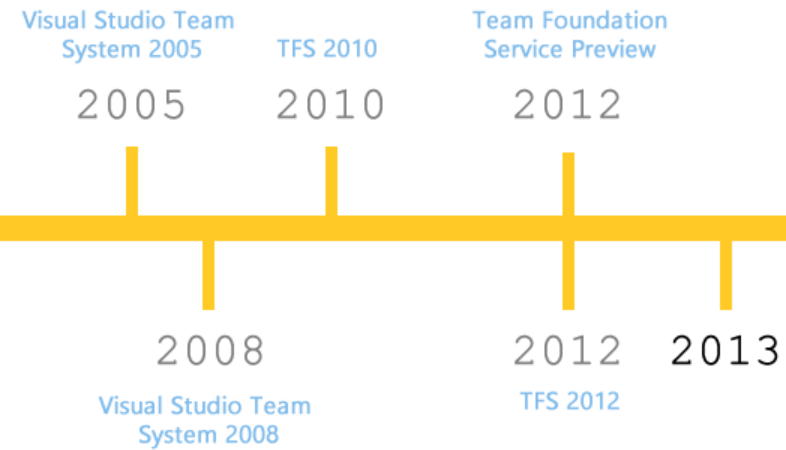

[Download software](#)
Download and install the software necessary to connect to your team project from Visual Studio, Eclipse, Excel, or Microsoft Test Manager.

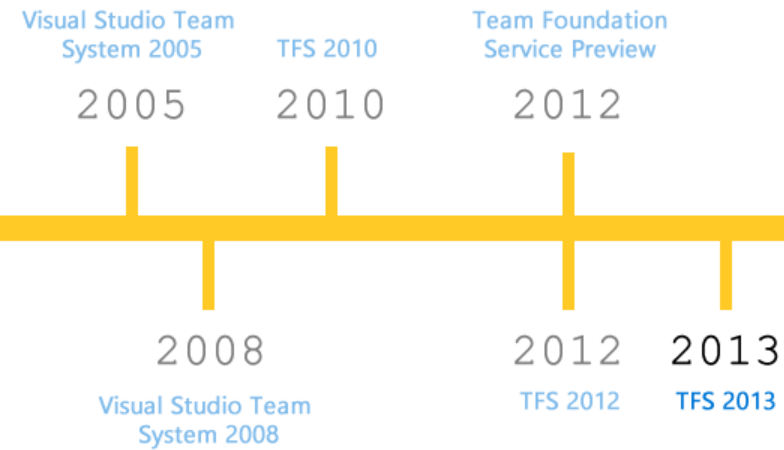

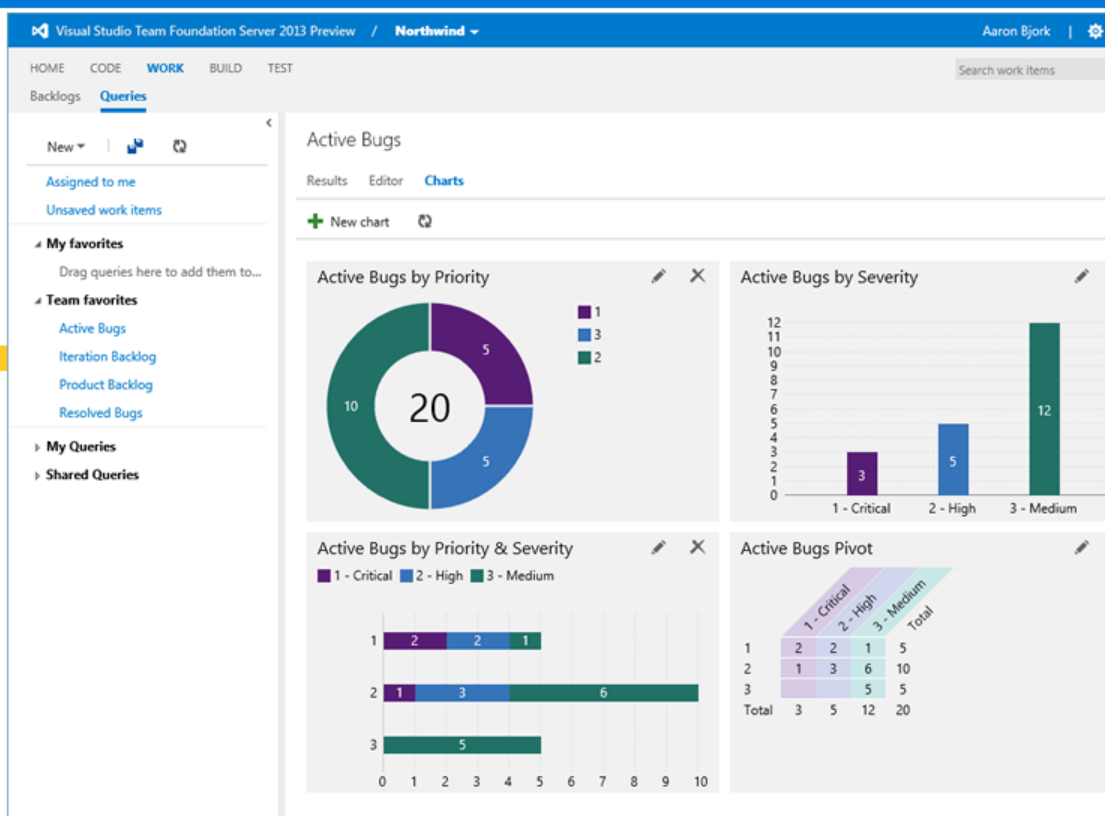

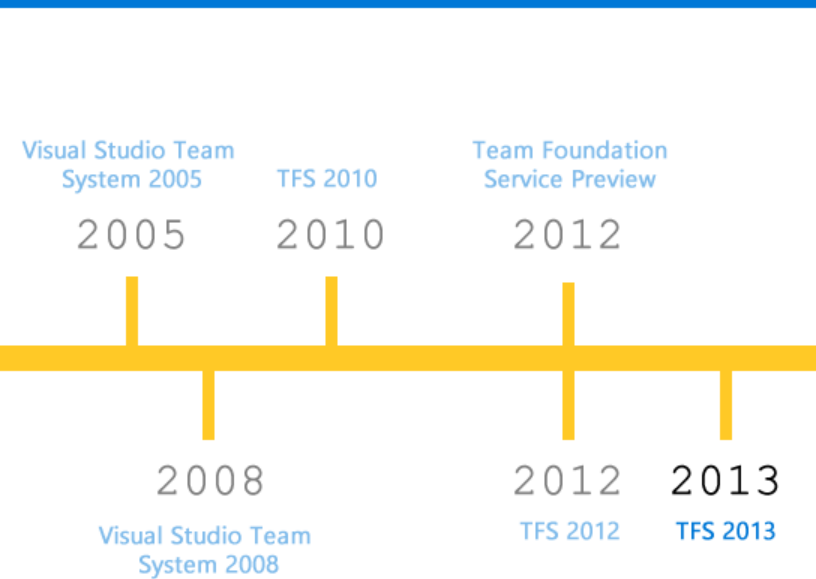

[Learn more, dig deeper](#)
Access online help for Visual Studio Application Lifecycle Management and Foundation Server.

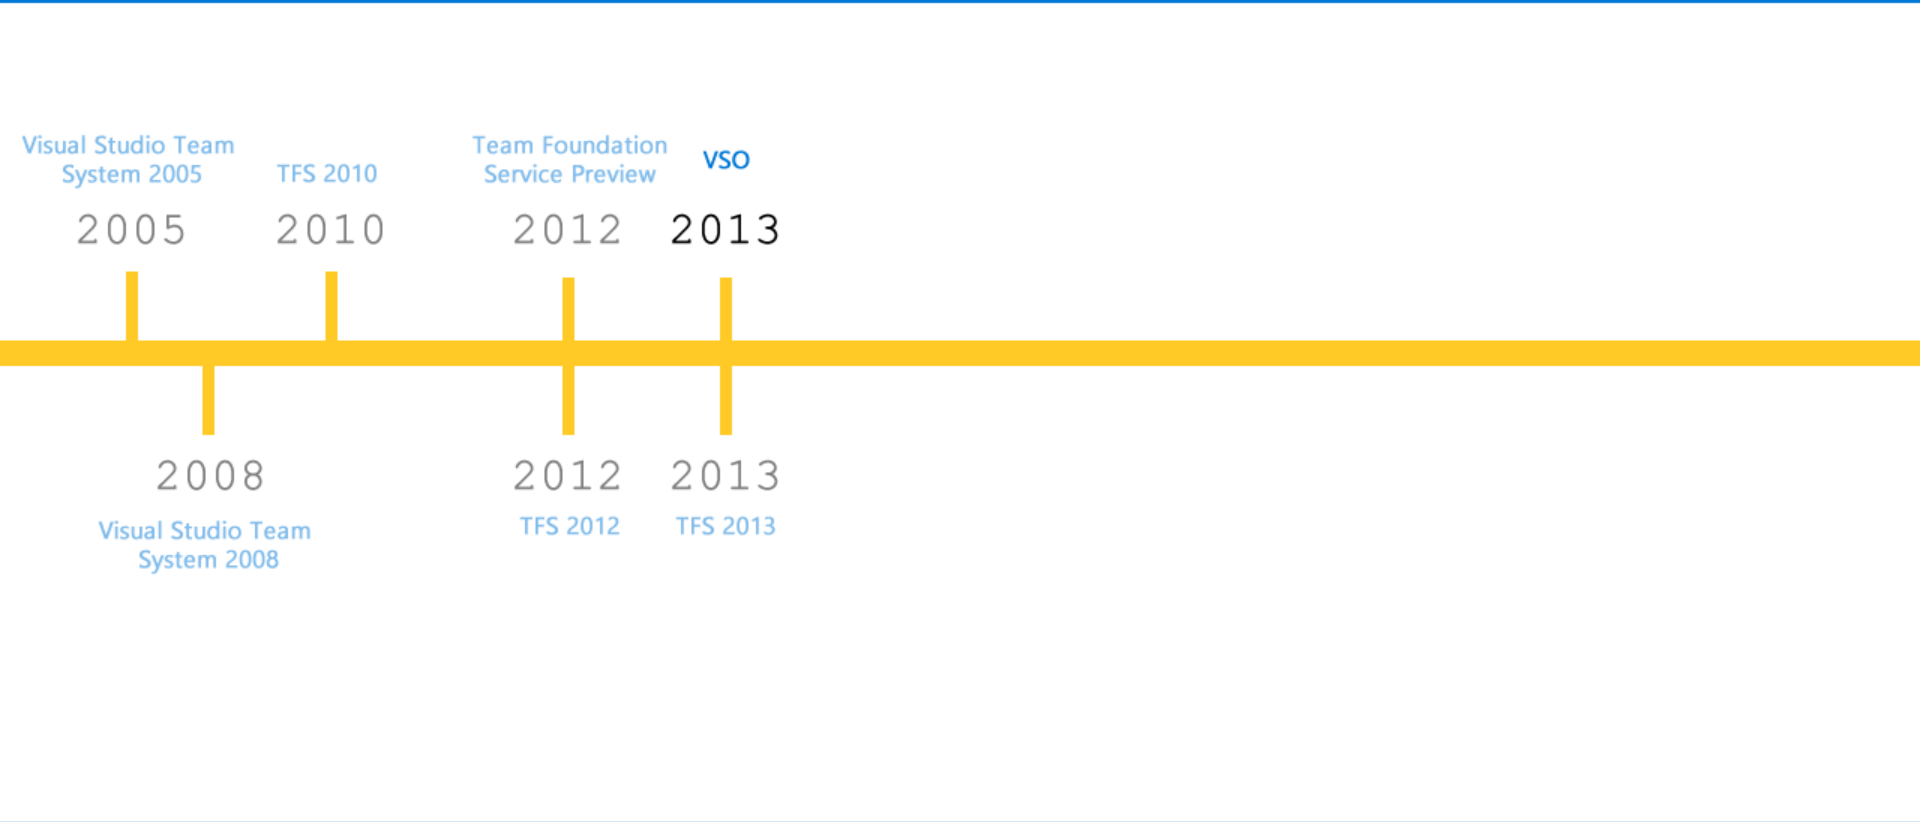

[Invitation Codes](#)
Got friends that would be interested in the Team Foundation Service preview? Click on the link above to get an invitation code you can share. Valid for up to 5 activations.

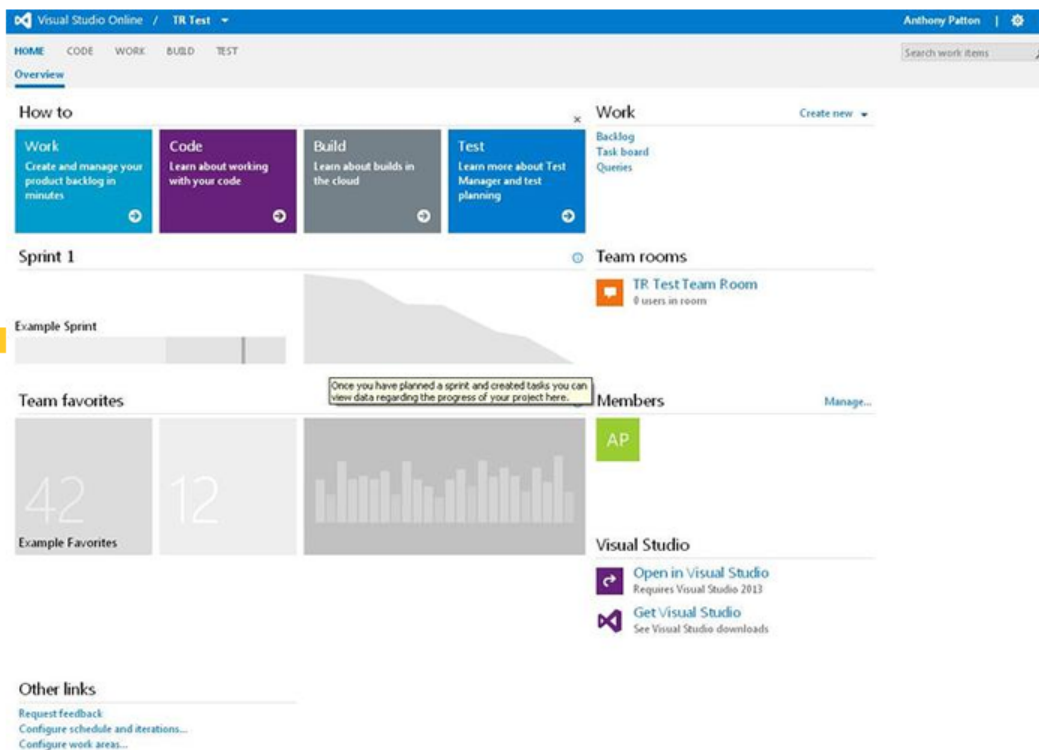

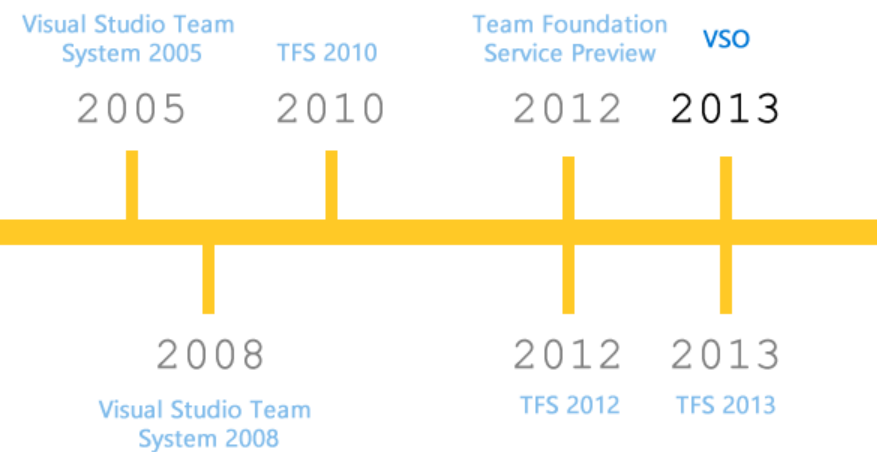

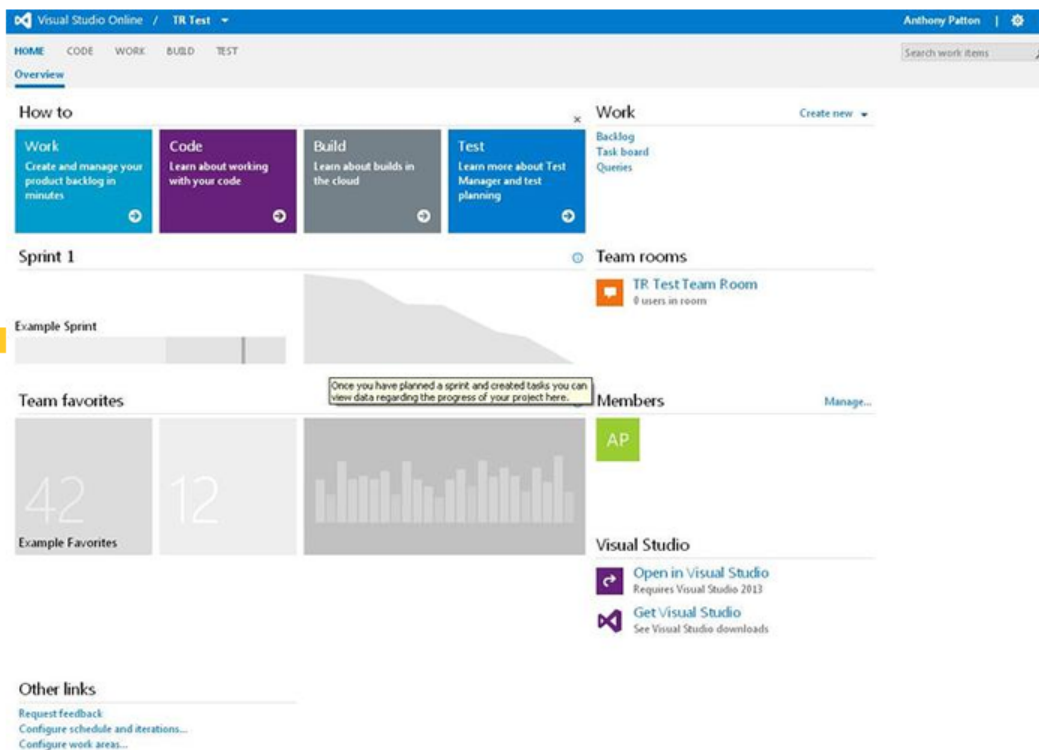

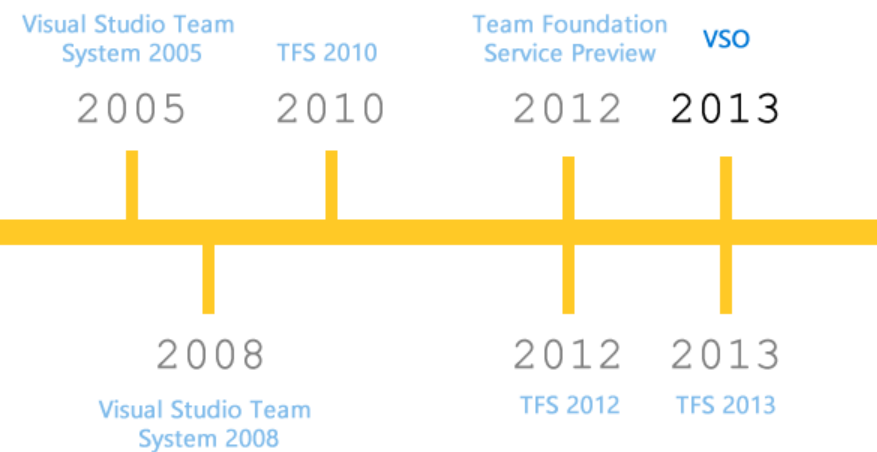

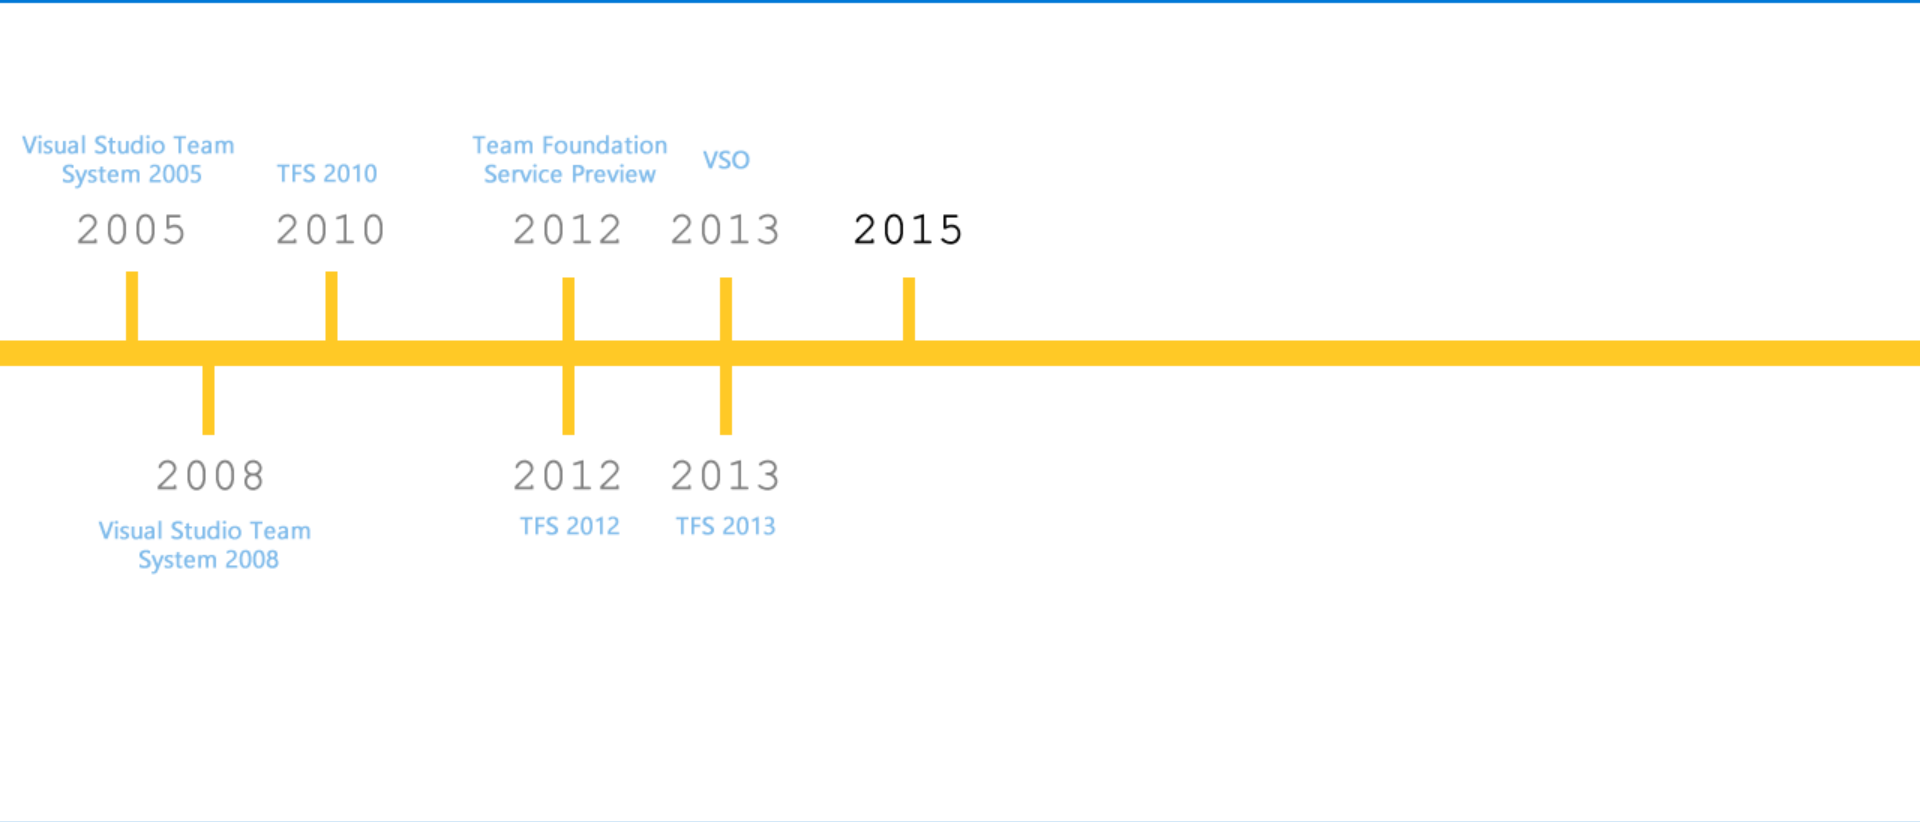

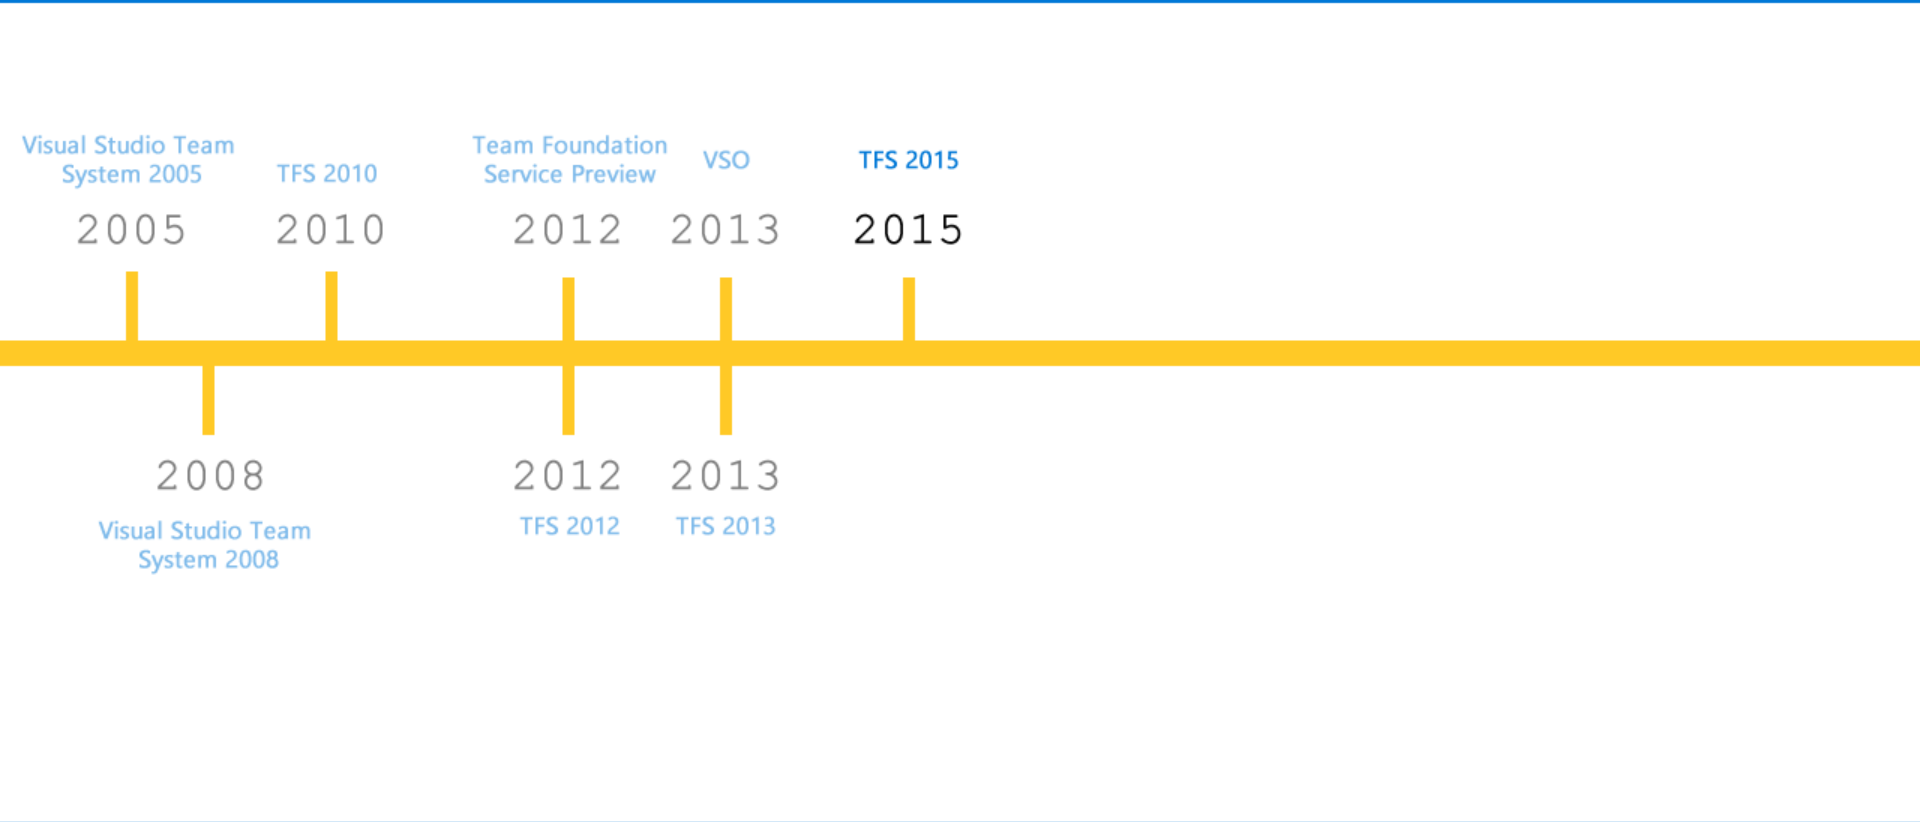

Timeline AzureDevOps

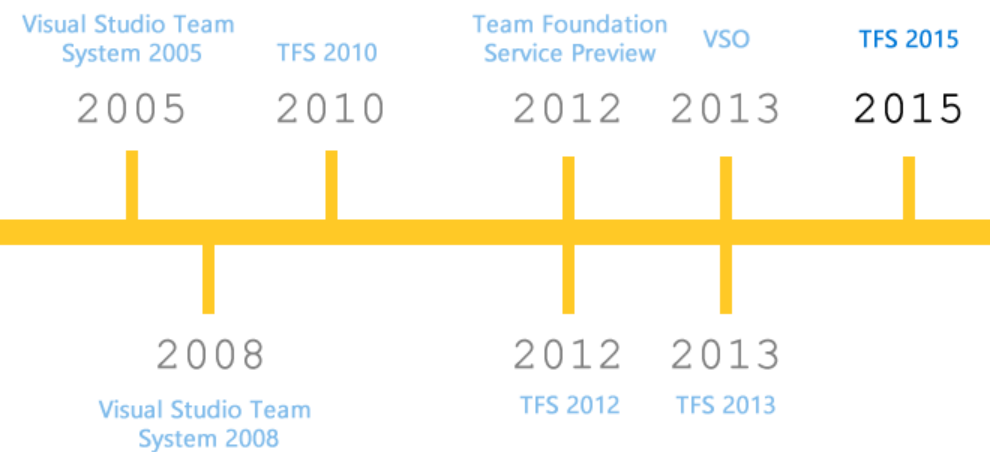

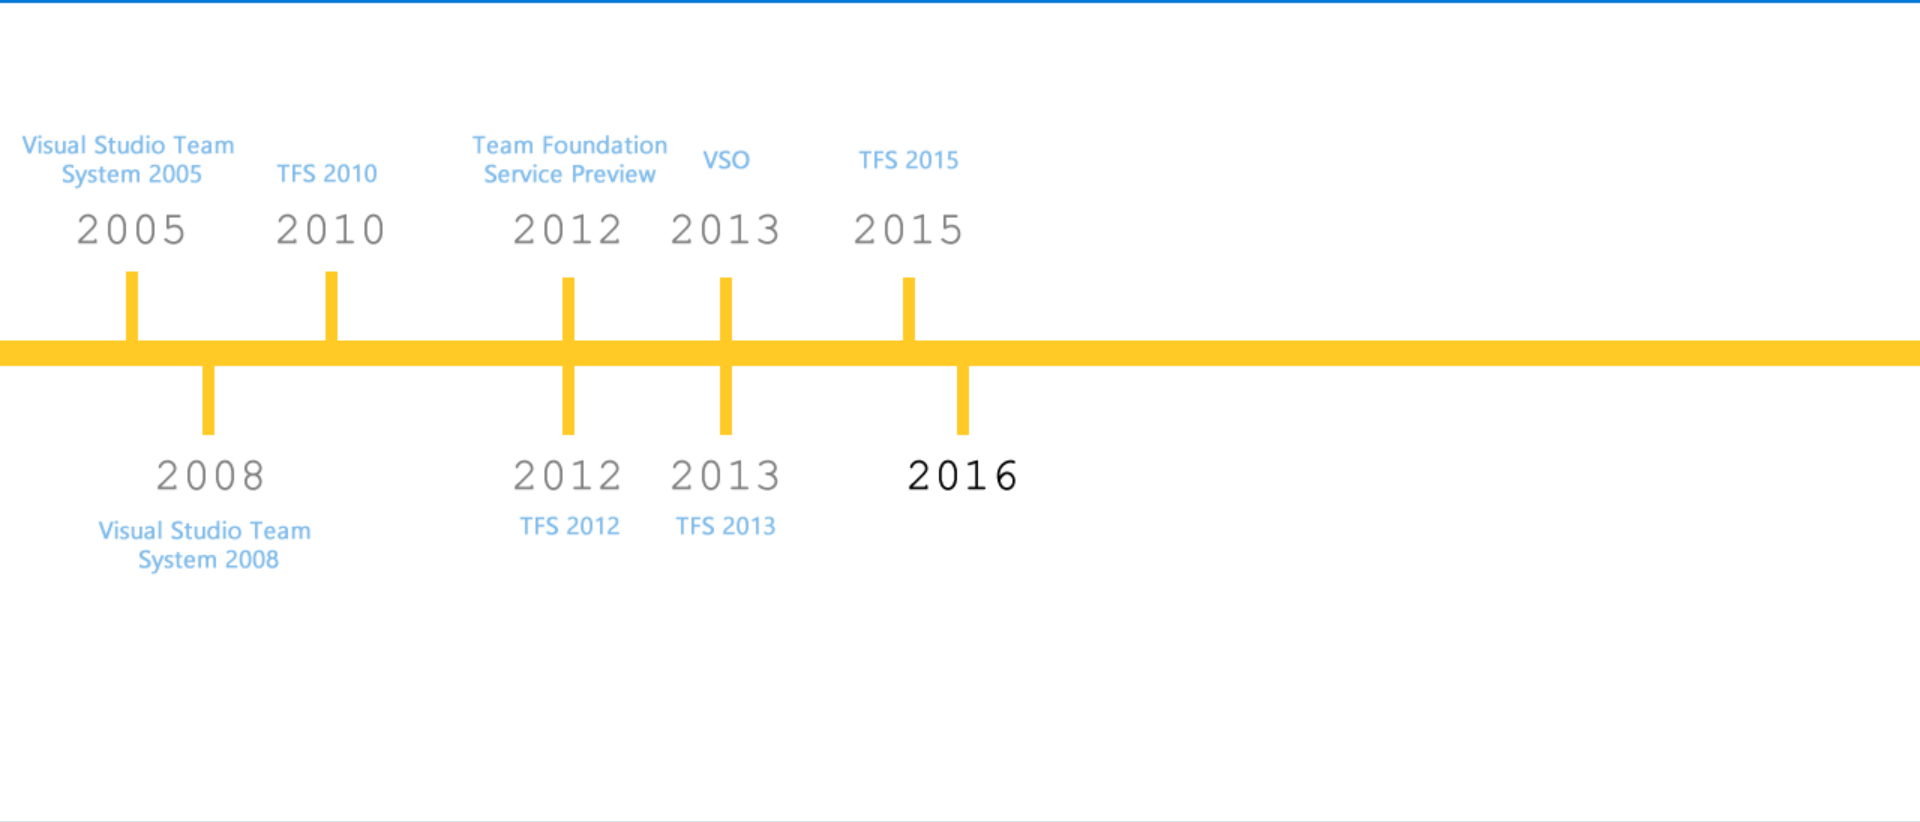

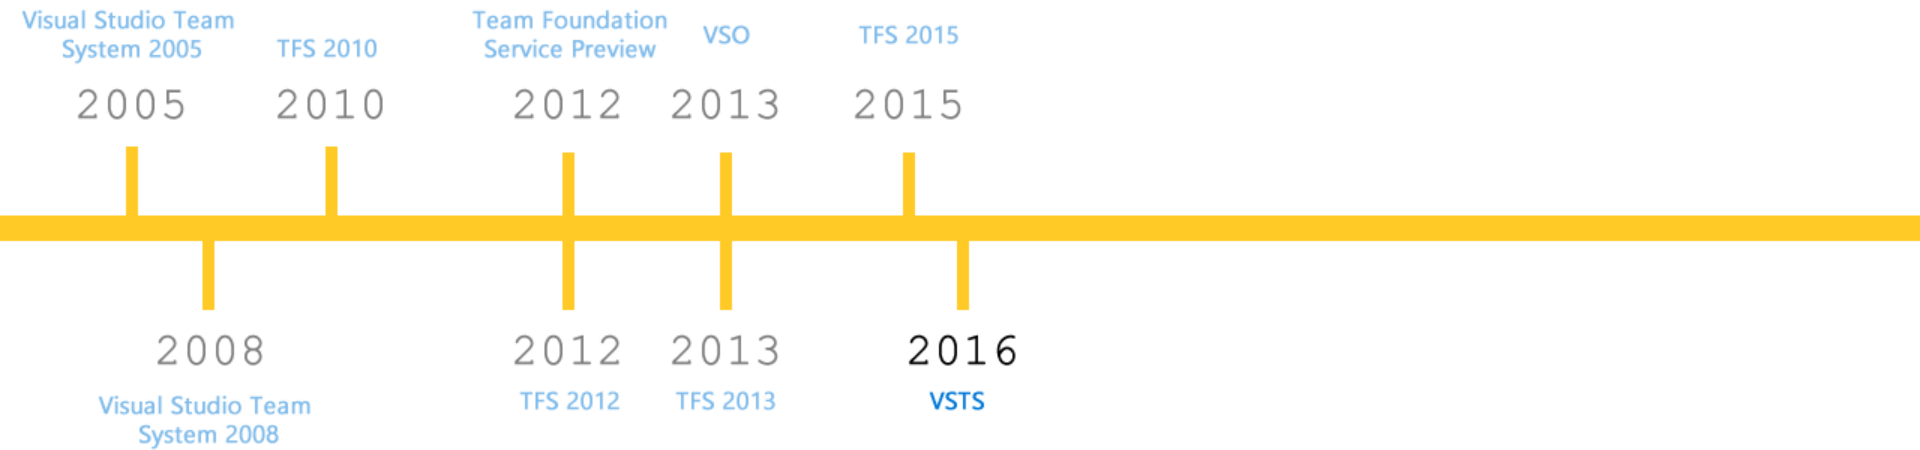

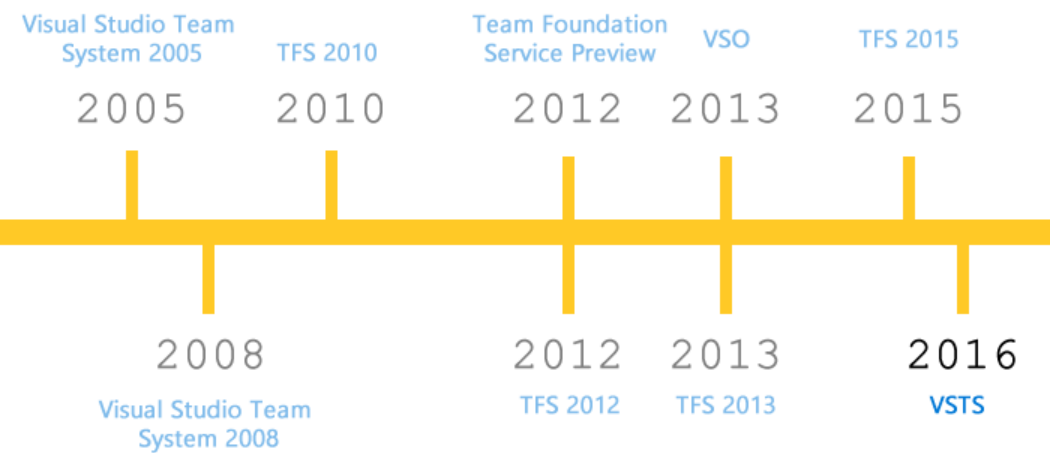

The screenshot shows the 'Board' view in Azure DevOps. It features a 'Backlog' list on the left and a Kanban board on the right with columns for 'In Progress' (4/5 items) and 'Validation'. Each card displays a title, author, priority, and tags.

Backlog	In Progress (4/5)	Validation
144 Collapsed first column on the board Aaron Bjork Kanban Usability	137 Refactor the Kanban board toolbar so that it's not in the way and taking up valuable real estate on the board Aaron Bjork Severity 3 - Medium Priority 2 Kanban Usability	126 Improved navigation - su... Aaron B. Backlog N...
136 Swim lanes on the Kanban board - expedite is the classic example Aaron Bjork Kanban	146 Filtering on the first column of the board Aaron Bjork Kanban	
145 Conditional formatting on all card types Noah Munger Extensibility Kanban	143 Adding additional fields to the card, including tags Aaron Bjork Extensibility Kanban	
147 Metrics on all cards on the board - start with lead time and...	128 The customization dialog is clunky, let's fix this so that includes more options and feels a bit more polished Noah Munger Severity 2 - High Priority 1 Customization	

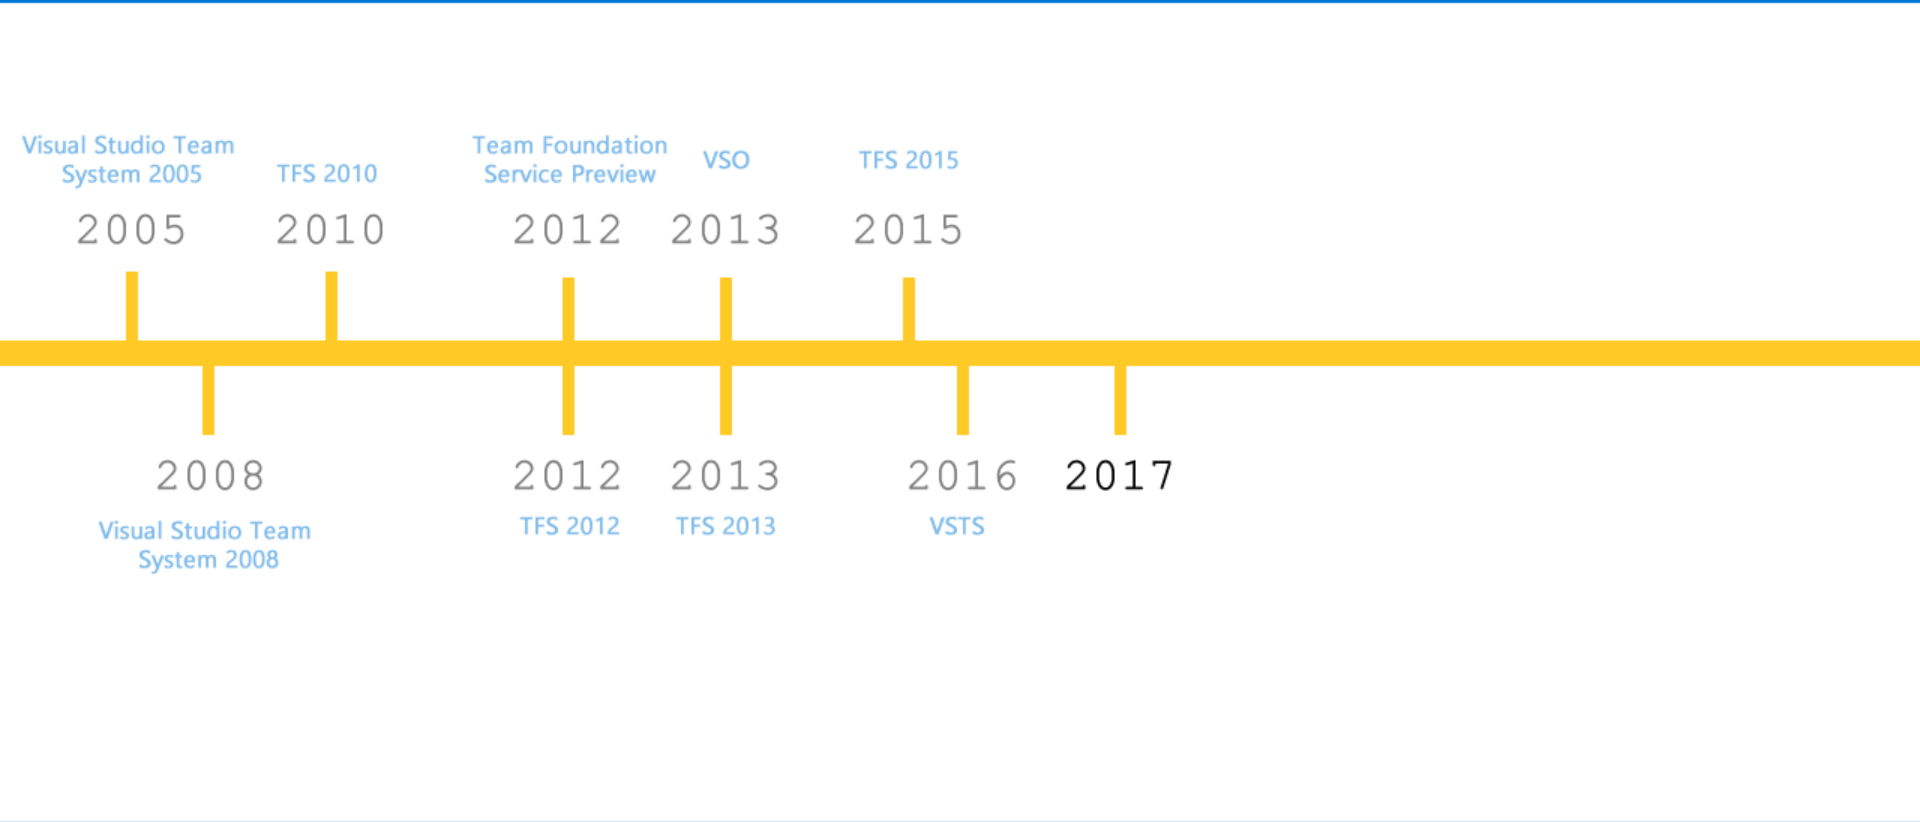

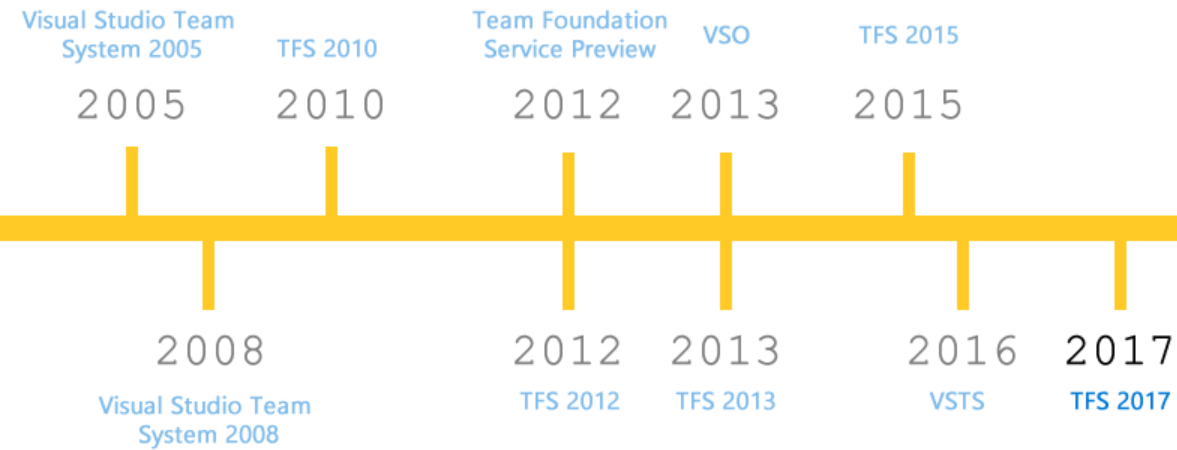

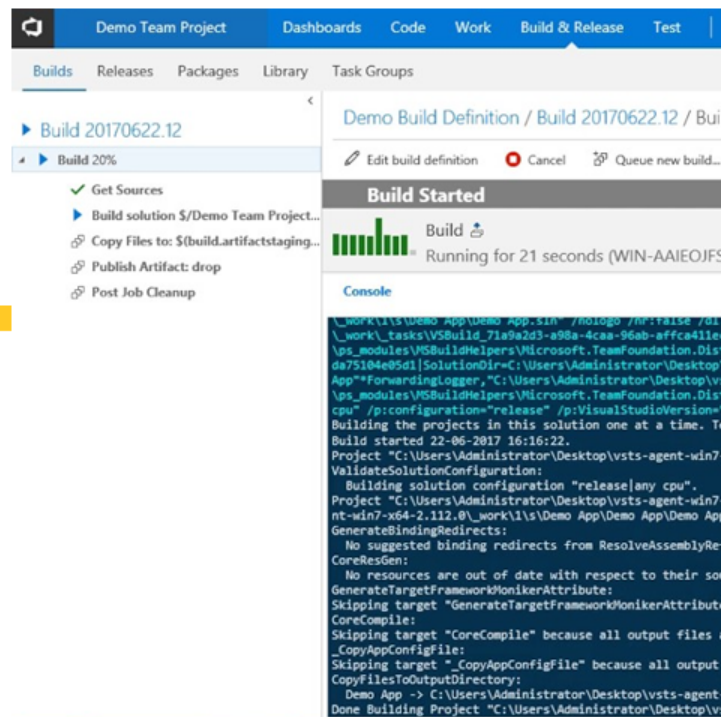

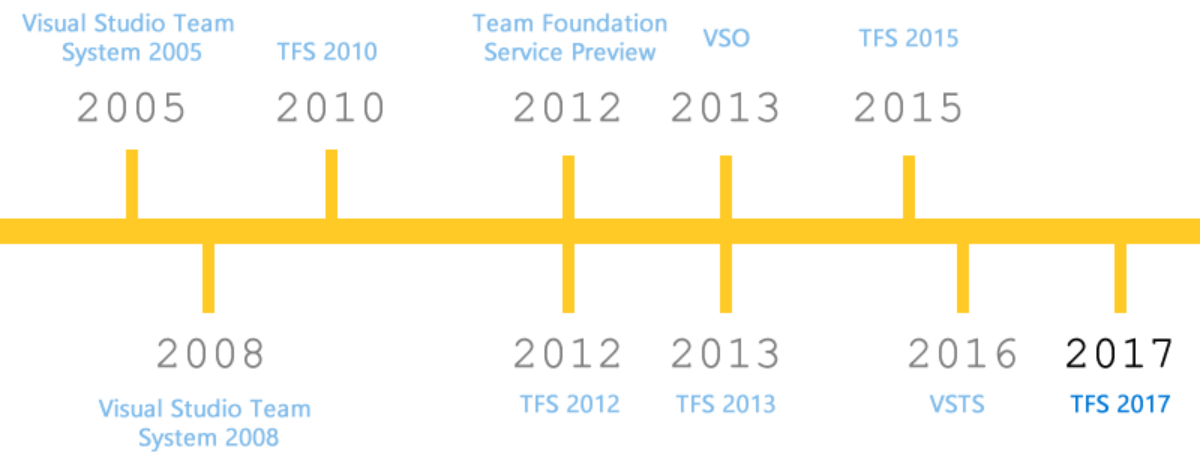

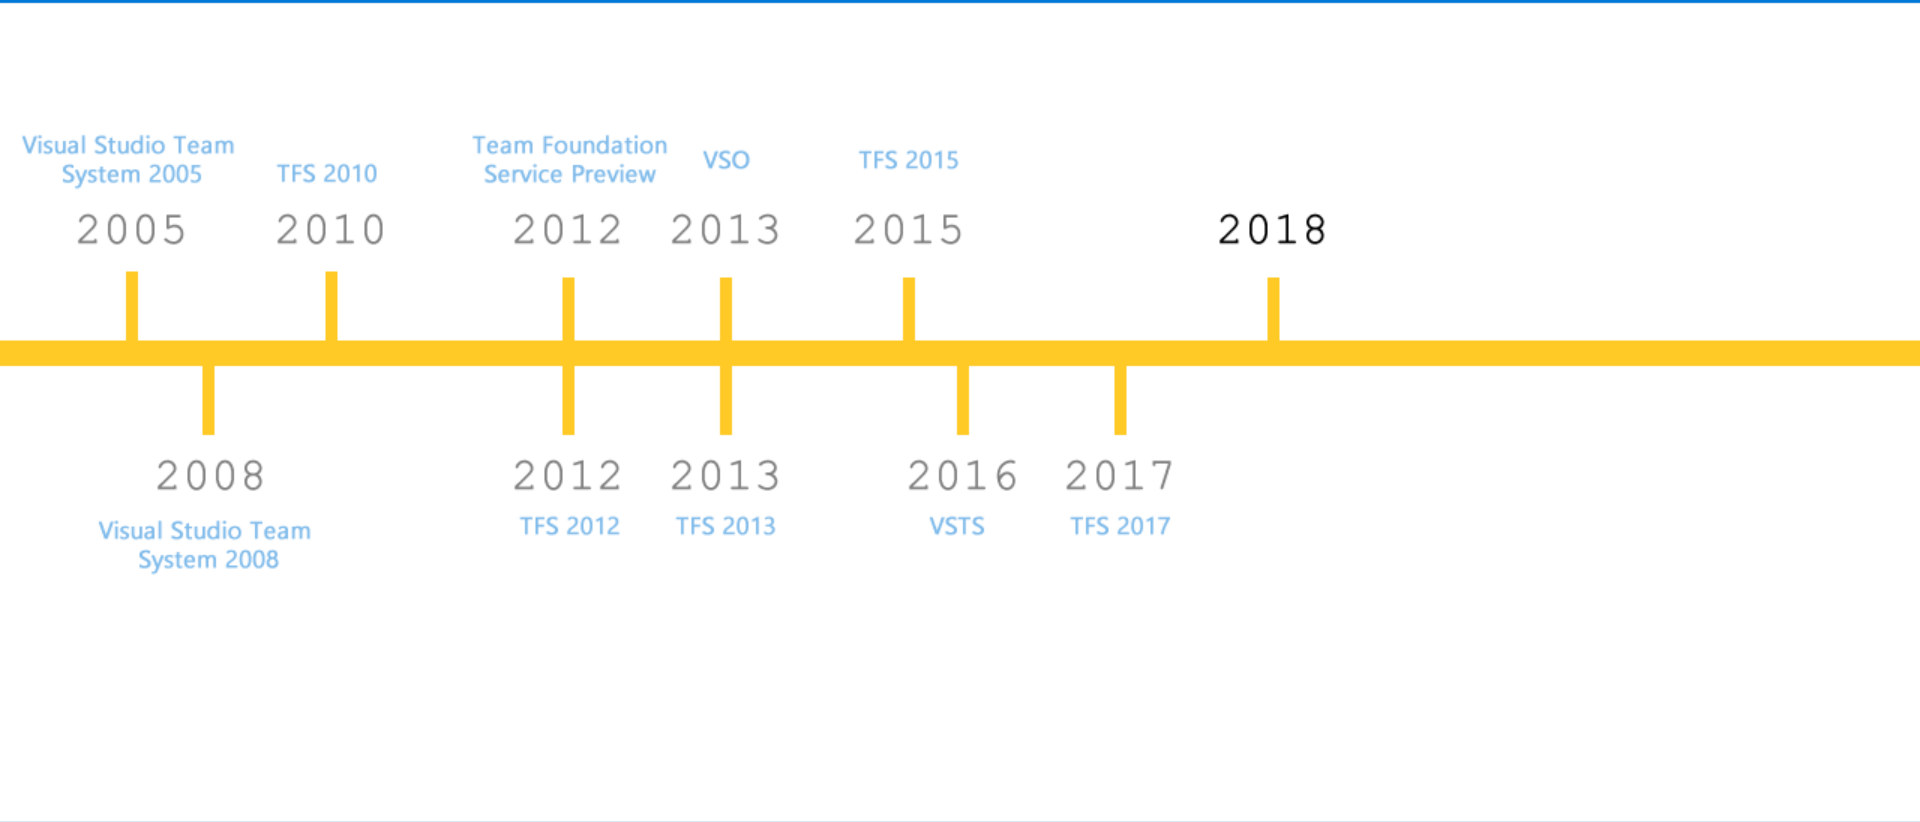

The screenshot displays the Azure DevOps Build & Release interface for a build named 'Build 318'. The interface is divided into several sections:

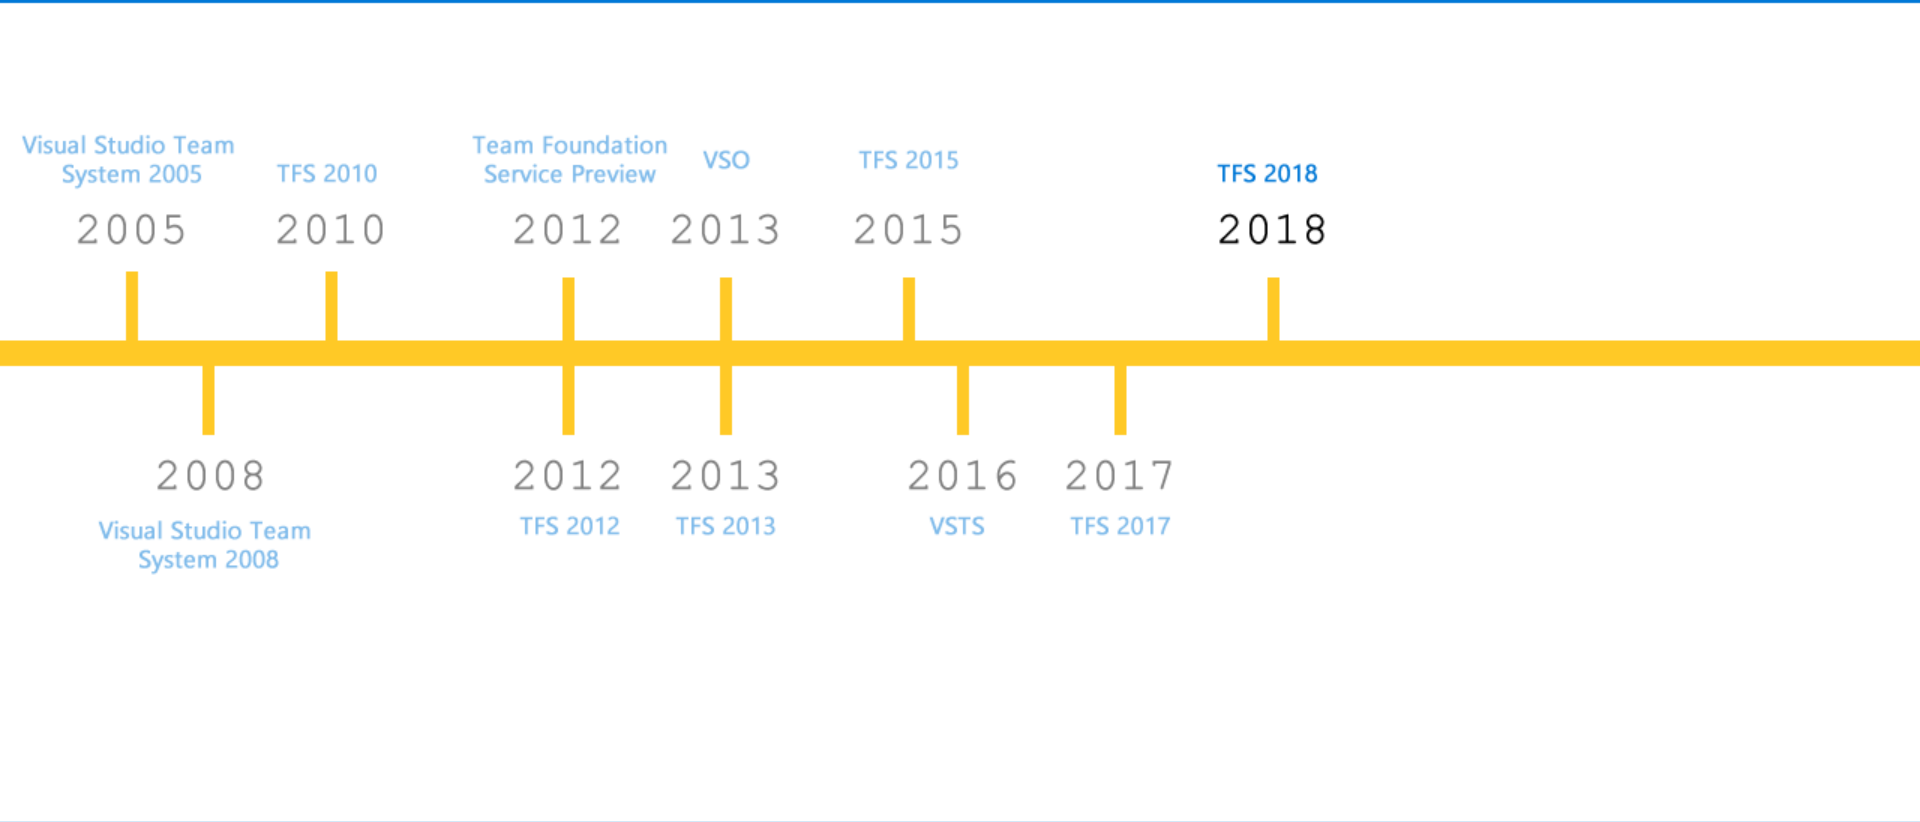

- Builds** tab: Shows a list of builds with a green checkmark indicating success.
- Build 318** details:
 - Build** status: **Build succeeded** (green bar).
 - Build 318** details: Ran for 4.7 minutes (Hosted Linux Preview), completed 6.8 hours ago.
 - Summary** tab: Shows a list of tasks and their status (green bar).
 - Timeline** tab: Shows a detailed view of the build process with a timeline bar.
 - Artifacts** tab: Shows a list of artifacts (green bar).
 - Code coverage*** tab: Shows a list of code coverage results (green bar).
 - Tests** tab: Shows a list of test results (green bar).
- Build definition** section: Lists the tasks executed during the build, including 'Initialize Agent', 'Initialize Job', 'Get Sources', 'Create githash.txt', 'Publish Artifact: source', 'npm install', 'npm run build', 'npm run test:unit', 'Publish Test Results', 'Publish Code Coverage Results', 'Build an image', 'Push an image', 'Publish Artifact: deployment-script...', and 'Post Job Cleanup'.

Azure DevOps interface showing the build history for the 'AdventureWorks Mobile' project. The interface includes a sidebar with navigation options like Overview, Boards, Repos, Pipelines, Builds, Releases, Library, Deployment groups, Test Plans, and Artifacts. The main area displays a table of build history with columns for Commit, Build #, Branch, and Date/time.

Commit	Build #	Branch	Date/time
Fix mdm encryption cert Robin Counts	10393	master	12:59 PM
Add mc cert - use rotatable secret for every iteration Robin Counts	10392	develop	10:32 AM
Cleanup auth handlers. Use handlers from the service Celeste Burton	10391	master	8:39 AM
Make kusto and admin apps optional Robin Counts	10390	feature/2-factor-auth	Yesterday, 2:45 PM
[Streaming][Bug] Closing stream before injecting Colin Ballinger	10389	master	Yesterday, 11:13 AM
Fix deployment arm param Colin Ballinger	10388	master	Tuesday, 1:49 PM
[Streaming] Handling oversized payload by finder Celeste Burton	10387	feature/some-feature	Monday, 2:13 PM
Fixing RDP bug Kar Larsson	10386	master	Jul 6, 4:23 PM
Fix KV URL resolution Robin Counts	10385	hotfix/view-perf	Jul 5, 1:43 PM
Fix debug console output when running unit tests Robin Counts	10384	master	Jul 3, 9:48 AM
Fix mdm encryption cert Robin Counts	10383	master	Jul 1, 11:31 AM
