## Release variables

Variable name	Description
Release.DefinitionName	<p>The name of the release pipeline to which the current release belongs.</p> <p>Example: <code>fabrikam-cd</code></p>
Release.DefinitionId	<p>The ID of the release pipeline to which the current release belongs. Not available in TFS 2015.</p> <p>Example: <code>1</code></p>
Release.ReleaseName	<p>The name of the current release.</p> <p>Example: <code>Release-47</code></p>
Release.ReleaseId	<p>The identifier of the current release record.</p> <p>Example: <code>118</code></p>
Release.ReleaseUri	<p>The URI of current release.</p> <p>Example: <code>vstfs://ReleaseManagement/Release/118</code></p>
Release.ReleaseDescription	<p>The text description provided at the time of the release.</p> <p>Example: <code>Critical security patch</code></p>
Release.RequestedFor	<p>The display name of identity that triggered the release.</p> <p>Example: <code>Mateo Escobedo</code></p>
Release.RequestedForEmail	<p>The email address of identity that triggered the release.</p> <p>Example: <code>mateo@fabrikam.com</code></p>

Release.DeploymentID	<p>The ID of the deployment. Unique per job.</p> <p>Example: 254</p>
Release.DeployPhaseID	<p>The ID of the phase where deployment is running.</p> <p>Example: 127</p>
Release.Environments.{stage-name}.status	<p>The deployment status of the stage.</p> <p>Example: InProgress</p>
Release.ReleaseWebURL	<p>The URL for this release.</p> <p>Example:</p> <p><a href="https://dev.azure.com/fabrikam/f3325c6c/_release?releaseId=392&amp;_a=release-summary">https://dev.azure.com/fabrikam/f3325c6c/_release?releaseId=392&amp;_a=release-summary</a></p>
Release.SkipArtifactDownload	<p>Boolean value that specifies whether or not to skip downloading of artifacts to the agent.</p> <p>Example: FALSE</p>
